

World-Class Quality. Supported by Science.

est. 1949

Kyowa Hakko is a world-class manufacturer of a wide range of amino acids and related compounds, vitamins and nucleic acids.

We were established nearly 70 years ago, leading the way as inventors of the world's first fermented L-Glutamic acid.

As pioneers of amino-acid fermentation, we have always strived to find new ways to provide our partner brands with the best quality products in the world.

Our patented science and processes mean we are a global leader in the development, manufacturing and marketing of ingredients for nutraceutical, pharmaceutical and food industry.

Patented Fermentation Process

Kyowa was the first to provide unique, innovative fermentation technology which has enabled the production of amino acids on an industrial scale for the very first time.

Plant based fermentation

No animal or human origin

No Transmissible Spongiform Encephalopathy (TSE)

Sustainable production methods

Global Production Sites

Our multiple production sites around the world guarantee your continuity of supply.

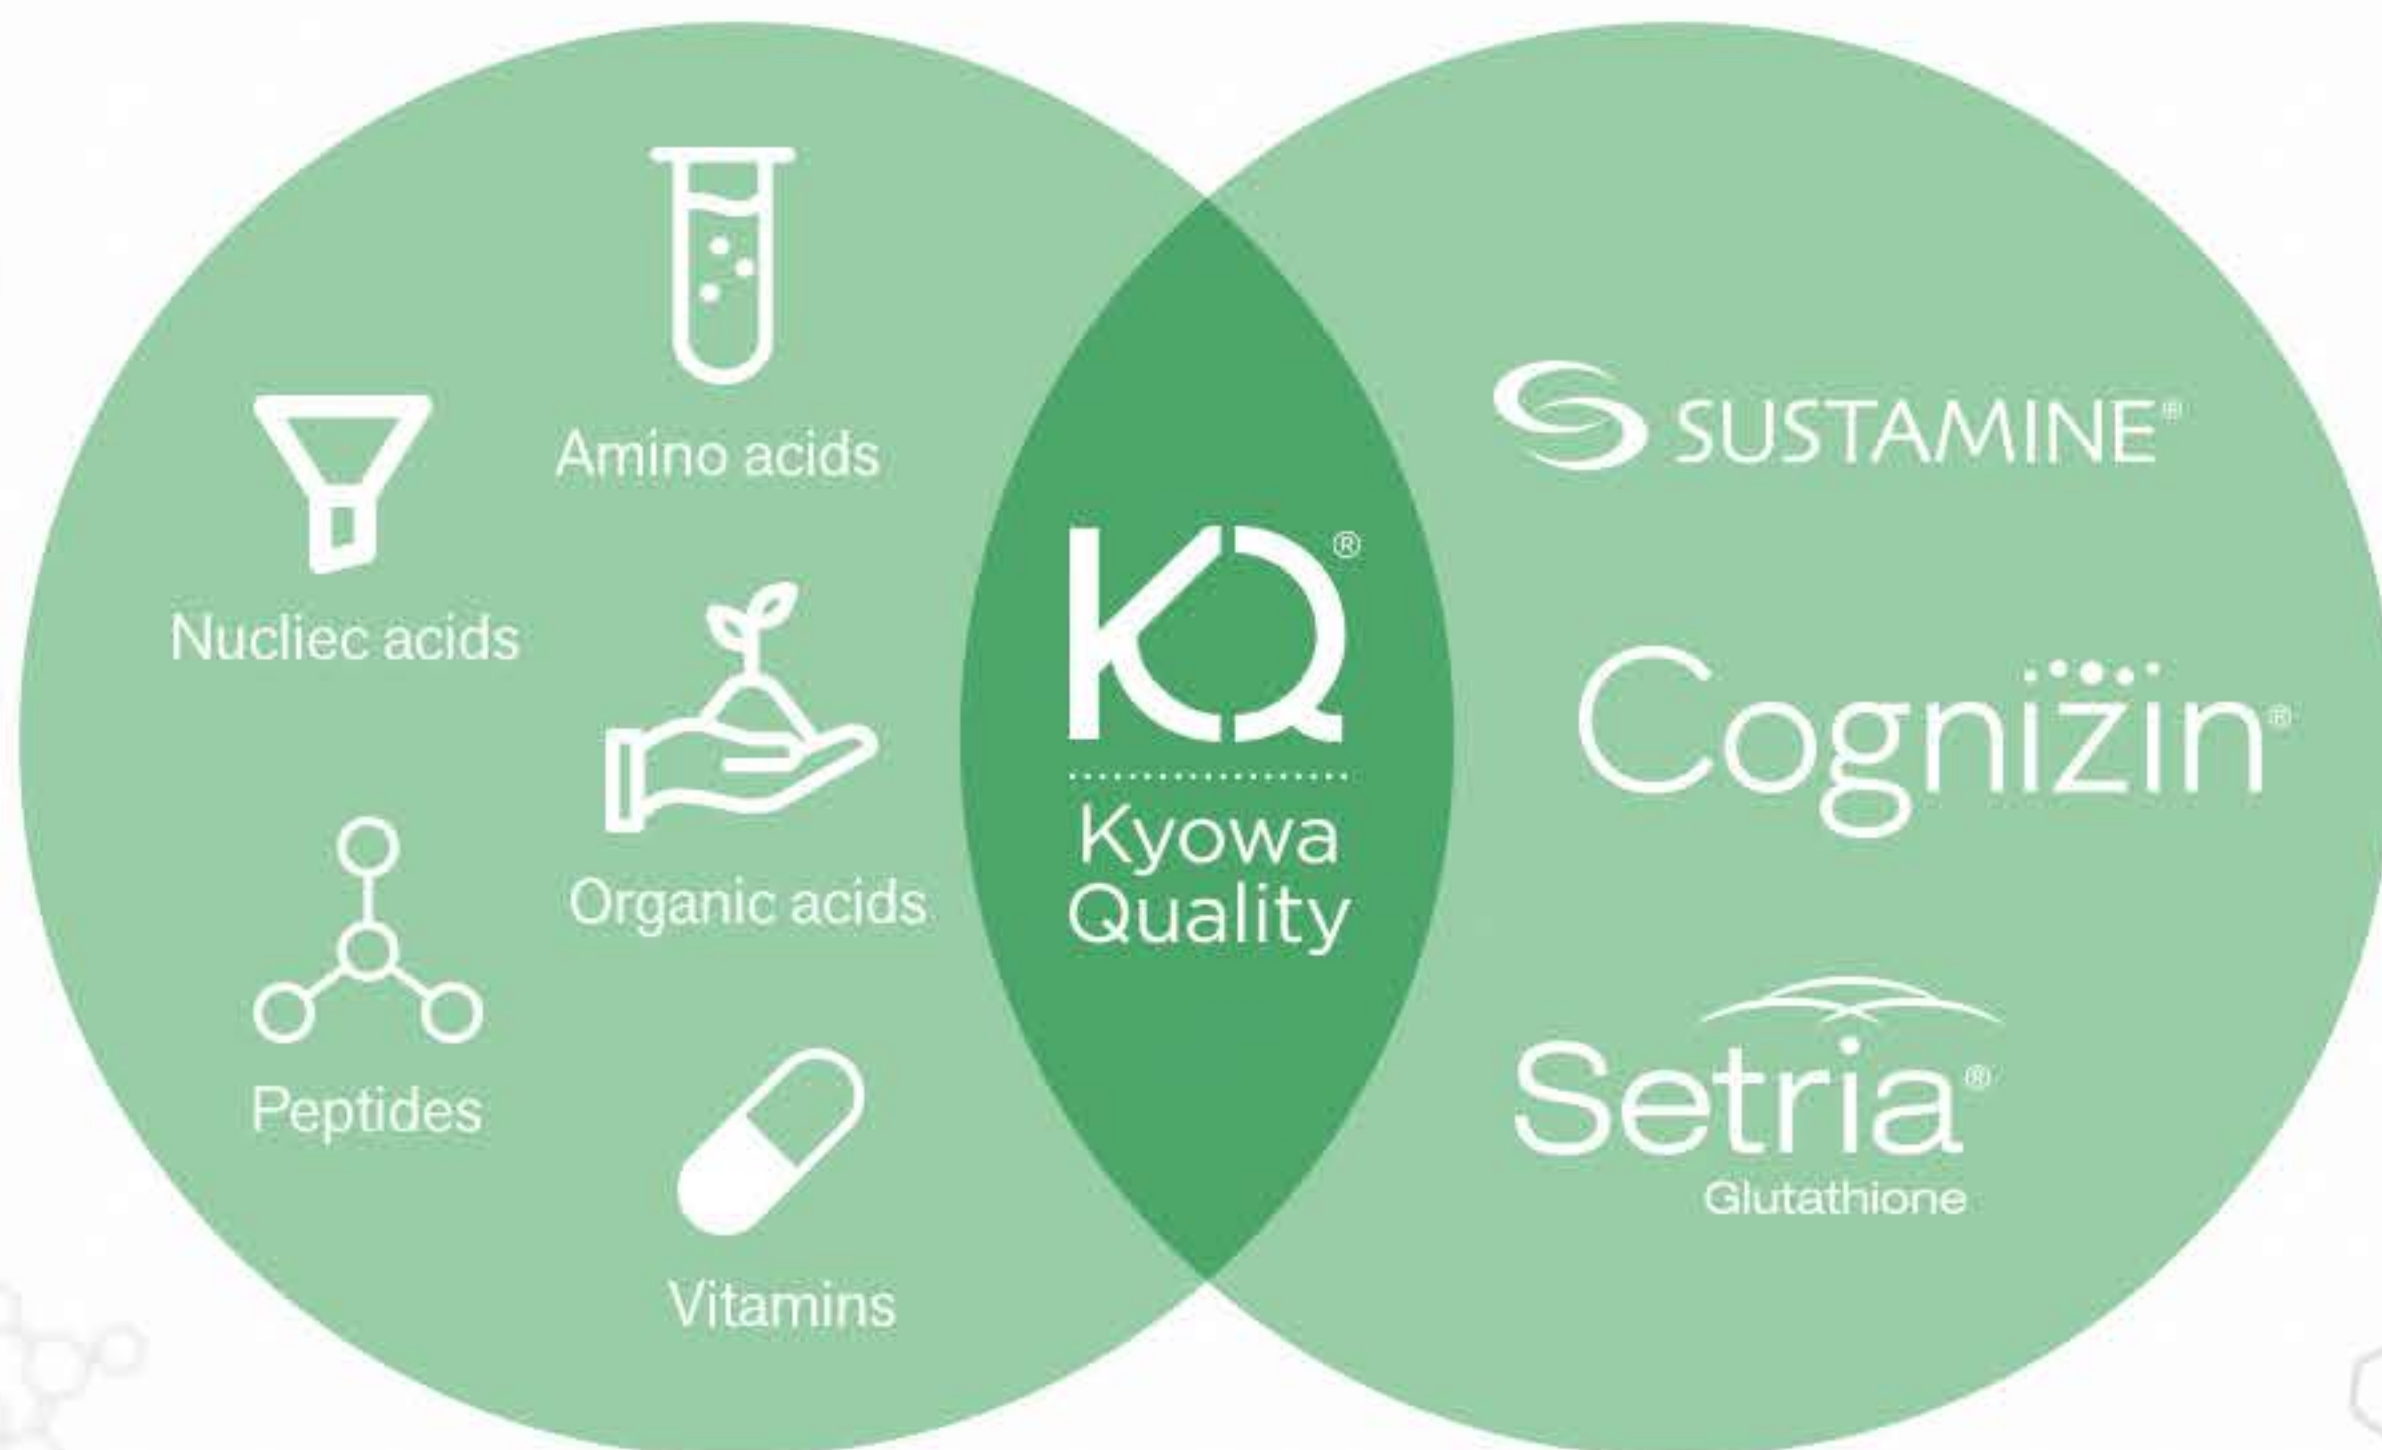

We have distribution centers and offices that provide local services including sales and marketing support.

Kyowa Quality Brand Promise

The Kyowa Quality logo is your guarantee that the ingredients are backed by our commitment to the highest standards.

The Kyowa Quality logo assures customers that our ultra-pure line of unbranded amino acids are produced using the same sophisticated technologies and high-quality standards as our branded ingredients.

Kyowa Quality. The Science Of Life.
